It is very important that all the pebbles are used and arranged as shown in order to achieve the desired flame picture.

It may be necessary to remove some or all of the pebbles to clean them at some time. Cleaning must only be done using a soft brush.

CAUTION: The pebbles are extremely fragile and must be handled accordingly. Gloves should be worn and any inhalation of dust should be avoided. The pebbles must be kept away from children at all times. Never put additional pebbles on the fire. Never use pebbles other than those originally supplied, or genuine Legend Spare Parts.

1. Place the rear pebble set on the rear ceramic retainer ledge in a central position (Fig. 29).

2. Place the main fuel bed on to the middle section of the metal burner tray. It is important that the front edge of the fuel bed is located behind the burner strip (Fig. 30).

3. Position the front pebble set on the front ceramic retainer, making sure that the back edge is pushed up against the front of the burner strip (Fig. 31).

4. Place the side cheeks into position, making sure they are positioned either side of the fuel bed and the overhang is at the front. The outside edge should be in contact with the radiant box ceramic liner. Ensure that the lower part of the side cheeks sit on the front pebble set and are in front of the rear pebble set (Fig. 32).

5. Following Figs. 33 to 35, place the loose pebbles on to the fuel bed. It is important that the pebbles 'nest' together and sit on top of the fuel bed peaks.

6. Make any adjustments necessary to achieve even gaps as this will help in giving a well balanced flame picture and an even glow. After running the fire for 30 minutes, it may be necessary to adjust the pebbles with tongs.

Where possible, make sure that the flames do not play on the ceramic fire box liners, as this may cause sooting.
